

WHYALLA STEELWORKS NOTICE

Pelletising Plant Cold Shutdown – Maintenance Notice

Commencing Sunday, 8 June 2025

Whyalla Steelworks will undertake a scheduled cold shutdown of its Pelletising Plant to carry out essential maintenance aimed at enhancing the plant's performance, reliability and environmental efficiency.

Shutdown Schedule: Start: 12:00 PM, Sunday 8 June 2025

Duration: Approximately 20 Days

This shutdown will involve around 150 contractors and employees and will enable maintenance in areas typically inaccessible during normal operations due to high temperatures.

While the shutdown is essential for long-term improvements, some short-term impacts may occur, including:

- temporary increase in emissions during plant shutdown and restart phases. These will be closely monitored and managed with strict controls in place.
- increased noise levels, including at night, due to the use of mobile equipment.
- higher traffic volumes and parking demand in the McBryde Terrace area.

For further information, or to raise concerns, please contact the Whyalla Steelworks email.
